Education

CARNEGIE MELLON UNIVERSITY

School of Computer Science

PhD in Societal Computing (Year 5; GPA: 4.23/4.33)

Aug 2020 – Present

Advisors: Fei Fang,

Norman Sadeh

UNIVERSITY OF BRITISH COLUMBIA

Department of Computer Science

Honours BSc in Computer Science (Average: 92.9%)

Sep 2015 – May 2020

Advisor: Kevin Leyton-Brown

Refereed Conference Papers

Submissions Under Review

- [14] **Rex Chen**, Karen Wu, John McCartney, Fei Fang, & Norman Sadeh (2025) “Out of the Past: An AI-Enabled Pipeline for Traffic Simulation from Noisy, Multimodal Detector Data and Stakeholder Feedback”.
- [15] **Rex Chen**, Stephanie Milani, Zhicheng Zhang, Fei Fang, & Norman Sadeh (2025) “Nothing Personal: Efficient, Team-Based Coordination of Decision Trees for Interpretable Multi-Agent Reinforcement Learning”.

Invited Talks

- [16] “**Multi-Agent Reinforcement Learning for Applications in Transportation**”. University of Pittsburgh, CS3710: AI for Social Good (Spring 2024; instructor: Ryan Shi): guest lecture.
- [17] “**Fighting the Fog: Evaluating the Clarity of Privacy Disclosures in the Age of CCPA**”. CyLab Partners Conference (2021; online): oral presentation and lab tour.
- [18] “**Explore Usable Privacy: An Website Privacy Policy Dataset Incorporating Human and Machine Annotation**”. CyLab Partners Conference (2020; online): poster and oral presentation.

Skills

- **Languages/Frameworks:** Python (PyTorch, TensorFlow, Django, Flask), R, SQL (Hive, Spark, PostgreSQL, MySQL), C#, Docker, HTML, CSS, JavaScript, Bash, PowerShell, C++, Java, MATLAB
- **Knowledge Areas:** Reinforcement learning, transportation research, interpretable machine learning, human-computer interaction, statistical modelling, causal inference, computational game theory

Industrial Work Experience

DATA SCIENTIST INTERN

Lyft

May 2024 – Aug 2024

- Designed, trained, and productionised ensemble machine learning models to predict the responses of gig drivers to real-time incentive mechanisms across multiple markets.
- Applied causal inference methods to derive actionable insights for setting incentive policies, including a proposed feature envisioned in collaboration with multiple cross-functional teams.

SOFTWARE DEVELOPER CO-OP

Change Healthcare

Sep 2017 – Apr 2018

- Worked with senior software developers to code, test, and deploy bug fixes and upgrades for two leading healthcare workflow products.
- Took on a primary role in researching, developing, and integrating an authentication service for inter-service communications, including a custom logging mechanism, using an open-source library in the .NET Core framework.

Academic Work Experience

PHD CANDIDATE

Software & Societal Systems Department, Carnegie Mellon University Aug 2020 – Present

- Researching applications of multi-agent reinforcement learning, human-computer interaction, and computational game theory to problems in transportation, including traffic signal control and ridesharing.
- Focusing on designing multi-agent systems for deployment in real-world contexts marked by uncertainty.
- Led collaborative research projects involving three undergraduate and five master's students, entailing various research methods such as machine learning experiments, user studies, and literature reviews.
- Supported by an NSERC PGS D, a Mobility21 grant, and the Tang Family Endowed Innovation Fund.
- **Submissions:** [1, 3, 4, 5, 6, 7, 8, 9, 14, 15]; **Talks:** [16, 17, 18]

TEACHING ASSISTANT

Software & Societal Systems Department, Carnegie Mellon University Aug 2021 – Apr 2022

- **17-737/Executive Education** “Artificial Intelligence Methods for Social Good” (Fei Fang): Assisted with lectures, designed homework assignments, and co-advised course projects.
- **17-331/17-631** “Information Security, Privacy, and Policy” (Norman Sadeh): Assisted with lectures, co-advised course projects, and designed assessments.
Guest lecture: “Usable Security and Privacy” (October 12, 2021).

TEACHING ASSISTANT

Department of Computer Science, University of British Columbia Jul 2019 – Aug 2019

- **CPSC 213** “Introduction to Computer Systems”: Assisted with lectures and laboratories.

RESEARCH ASSISTANT

Department of Computer Science, University of British Columbia **May 2018 – Jun 2020**

- Trained graph neural networks end-to-end to predict propositional satisfiability with high accuracy and scalability on a challenging distribution, outperforming state-of-the-art hand-engineered features.
- Formalised conditions under which end-to-end neural network training can improve downstream optimisation performance, based on experiments with stochastic graph optimisation problems.
- Supported by Canadian NSERC Undergraduate Student Research Awards (2018, 2019).
- **Submissions:** [2, 10, 11]

TEACHING ASSISTANT

Department of Computer Science, University of British Columbia **Jul 2017 – Aug 2017**

- **CPSC 213** “Introduction to Computer Systems” (Anthony Estey): Assisted with lectures and laboratories.

TEACHING ASSISTANT

Department of Computer Science, University of British Columbia **Jan 2017 – Apr 2017**

- **CPSC 121** “Models of Computation” (Steve Wolfman): Assisted with lectures and laboratories.

INDEPENDENT RESEARCHER

Jun 2014 – Jan 2019

- Used natural language processing, network statistics, graph theory to analyse static and dynamic properties of social networks formed by associations between characters in literary fiction.
- Applied text-mining, classification, and clustering algorithms to analyse and visualise global scientific development through scientific journal publications over the span of 18 years.
- **Submissions:** [12, 13]

Activities

-
- 2024: **Program Committee Member** for AAAI 2025 Demo Track
 - 2022: **Volunteer** for IJCAI 2022
 - 2022: **Co-organiser** and **Moderator** for the *2022 CMU K-12 Summit on AI for Social Good*
 - 2021: **Co-organiser** and **Moderator** for the *2021 CMU AI and Social Good Symposium*
 - 2021: **Reviewer** for the *Workshop on Human and Machine Decisions at NeurIPS 2021* (WHMD '21)
 - 2019 – Present: **Maintainer** of the **Combinatorial Auction Test Suite**, a standard benchmark generator in auction research created by Kevin Leyton-Brown (<https://github.com/kevinlb1/CATS>)
 - 2016: **Reviewer** for *Scientometrics* ([proof](#))

Awards & Honours

- 2023: **Presidential Graduate Fellowship**, awarded by the CMU School of Computer Science
- 2023: **NSERC Postgraduate Scholarship – Doctoral** for proposal “Large Scale Learning for Multi-Agent Communication & Coordination in Transportation”
(Highly-ranked applicant, offered a Canadian Graduate Scholarship - Doctoral)
- 2022: **NSF Graduate Research Fellowship – Honourable Mention** for proposal “Large Scale Learning for Multi-Agent Communication & Coordination in Transportation”
- 2022: **Mobility21** (USDOT/CMU National University Transportation Centre) funding for proposal “Alleviating Traffic Congestion: Developing and Evaluating Novel Multi-Agent Reinforcement Learning Traffic Light Coordination Techniques” (PI: Fei Fang; Co-PI: Norman Sadeh)
- 2021: **Tang Family Endowed Innovation Fund** for proposal “Large Scale Learning for Multi-Agent Communication & Coordination in Transportation” (PI: Fei Fang)
- 2018, 2019: **NSERC Undergraduate Student Research Awards**
- 2016, 2017, 2019: **UBC Science Scholar & Dean’s Honour List**
- 2016, 2017: **Microsoft Tuition Scholarship**
- 2016, 2018, 2019: **Trek Excellence Scholarship**
- 2016: **J. Fred Muir Memorial Scholarship in Science**
